

SURVIVOR'S GUIDE

The Glory of the Lord

for the

DAYS OF NOAH - MATTHEW 24:36-39

Prepare for what? *you may wonder ...*

We are at the time of the End of 6,000+ years of recorded history of mankind and earth when the Grace of God is waning as the door CLOSES to this era. Nothing as we know it will be the same very soon. This brief Disclosure is to alert you to the cataclysmic CHANGES this ministry knows are happening right now and give you the sources you can check out for yourself. It is part of the responsibility we feel to help.

MORE IMPORTANT ...

WE URGE YOU TO GO TO GOD, HE IS THE SOURCE OF YOUR TOTAL SUPPLY. HE ALWAYS HAS BEEN OUR SAVIOR, OUR HOPE AND WHOLE LIFE, OUR PROTECTION AND GUIDE, OUR ALL IN ALL.

CALL ON HIM IN THESE DAYS OF TROUBLE; HE WILL HEAR YOUR HEART'S CRY AND

ANSWER. GOD ALMIGHTY CARES ABOUT YOU! HE IS EVERYWHERE.

The real power is not our Faith: it is the object of our faith—GOD ...it's not the amount of faith you have, it's about using the faith GOD has given you. And when you give, something you do to show your love and concern...he's the one who returns the harvest and blesses you. "Give us this day our DAILY bread," ... signs and wonders will follow them that believe. So believe that you may receive. Call upon GOD while he is near, GIVE AND IT SHALL BE GIVEN UNTO YOU; and EXPECT A MIRACLE TO HAPPEN TO YOU EVERY DAY!

THE EARTH IS ABOUT TO HAVE ITS VERY FOUNDATIONS SHOOK ! IT HAS TO HAVE A NEW FOUNDATION WHOSE BUILDER AND MAKER IS GOD, OUR AWESOME FATHER.

NOAH believed the warning and prepared his family; they all survived the pole shift of

their day – read Genesis 7:2-9, 17-23 - when it was time, earth was flooded and it happened SUDDENLY!

Dr. James Boice in his commentaries (specifically cites the legends of the Samo-Kubo tribe of New Guinea, the Athapascan Indians of America, the Papago Indians of Arizona, Brazilian tribes, Peruvian Indians, African Hottentots, natives of Greenland, native Hawaiian islanders, Hindus, Chinese, Egyptians, Greeks, Persians, Australian natives, the Welsh, Celts, Druids, Siberians, and Lithuanians.

Of the more than 200 cultures that have their own account of the flood the following aspects of the story are common:

- 88% describe a favored family
- 70% attribute survival to a boat
- 95% say the sole cause of the catastrophe is a flood
- 66% say that the disaster is due to man's wickedness
- 67% record that animals are also saved
- 57% describe that the survivors end up on a mountain

Many of the accounts also specifically mention birds being sent out, a rainbow, and eight persons being saved Genesis 7:24 The flood lasted 150 days without receding. "And the waters prevailed on the earth one hundred and fifty days."

One can look at the ancient history of our planet through the books of Immanuel Velikovsky and especially, "Earth In Upheaval. This man is a great source of the truth.

http://www.velikovsky.info/Earth_in_Upheaval

MOSES led the Israelites into the mountains; they escaped the (less extreme) pole shift of their era. Kolbrin Bible gives a good description of what went on in the days of Passover.

<http://www.ufodigest.com/kolbrin.html>

ONCE AGAIN, earth is going to go through a pole shift with a full cleansing and purification. This time Earth will have A New birth into the 4th dimension – a New Heavens and New Earth, where Love, Peace, Joy in God's spirit will come into being. Earth will be governed by the Kingdom of God. Gone will be the 3rd dimension of good & evil. War will come to an end. 2 Peter 3:13

After the cataclysms (termed the Aftertime), there will be a time of great opportunity because all the foundations of the past have been shattered, and ALL is to be rebuilt; there is almost endless opportunity. The creative nature relishes such times. The courageous will find a bountiful return for their efforts. It will be a time when the capacities of each can be stretched to their limits, and entities can learn of strengths and talents within themselves they had not imagined.

WE UNDERSTAND GOD IS SOVEREIGN, HE IS IN CONTROL AND HAS THE FINAL SAY. The Creator of the heavens and earth is LOVE, a just and merciful God is he. However, his "LOVE" has been given precedence over his judgment and justice for the last several years, putting aside his justice and punishment for iniquity (sin).

You may not know this, but ALMIGHTY GOD HAS AN ONGOING CONTROVERSY WITH THE NATIONS - their cup of iniquity is filled up. You can find this in Isaiah 24:18-23. Then compare with Matthew 24:29-44. God's justice is infinitely patient, but after awhile it demands punishment.

However, he is still REACHING OUT HIS HANDS TO WHOSE WHO ARE REACHING FOR HIM. Those who are saying, there must be more than this existence (even people who don't know him at all.) He does not want any person to perish, but that all come to him in repentance. (2 Pet.3:9)

In the book of Hebrews 12:26-27, it says that God will shake the earth terribly because Earth has entered the DAY OF THE LORD, and GOD will also use flaming fiery vengeance. 2 Thes.1:8)

Many say a loving God wouldn't judge the people of the earth in such a final way for their apostasy, idolatry and rebellion against him (his ways). Who are you to say what God would and wouldn't do? Are you wiser than he, can you judge him?

God will not leave his righteous judgment to any other source. He spoke a long time ago, "I alone have the right to take revenge. I will pay back." "The Lord will judge his people." Heb.10:30 (God's Word Trans.) Also read all of Isaiah 59. He is moving ahead to the Red Dragon.

However, earth has a cosmic enemy, a rouge planetary monster of old, known as The "Destroyer" a RED Dragon as in Chinese pictures, etc. Its orbit comes close to the earth every 3,665 years; which caused Nibiru to pass between the earth and sun in 2003. Because it is much larger than earth, its magnetic pull dominates and disturbs the earth every time it gets too close. The poles melt and change, the plates shift, smaller ones go under a bigger one, burying the land mass sitting thereon. Its presence causes super Earthquakes to occur and massive tsunamis, mountain ranges are built, land is split and water ways widened; Volcanoes erupt both on land and under the ocean, changing the atmosphere, heating the ocean waters.

Soon you will see RED TOXIC DUST come down from the sky as the tail of the planet wraps around the earth when it leaves our atmosphere. This huge beast has approx. 24 moons spread on two sides like wings; the whole appearance is shrouded in red dust, no wonder it's such a terrible sight to behold

In his book, The 12th Planet, Dr. Zechariah Sitchin, identified this monster as "Nibiru", planet of the crossings. He translated the earliest known language of cuneiform by which the Sumerians put down their discoveries on clay tablets. Statuettes, stone cylinders with mirror engravings of the symbols and drawings depict what is recorded on clay tablets from long ago. The bible refers to this civilization as the land of Shinar, near Iraq (ancient Babylon} and Iran.

The Hopi Indians and other indigenous tribes are preparing for the Transition. They have seen the "blue star" and know the Red Dawn will soon appear.

<http://www.wolfodge.org/bluestar/bluestar.htm>

The History Channel aired some very helpful information about this subject the evening of January 19, 2011. Others shows with similar information are being shown because the time is at hand. The US government will not come out and tell people what's really going on in the

heavens, but NASSA and other planetary sites are watching to see how close Nibiru, the fiery red planetary ship, is to earth and determine when it will leave our atmosphere.

Politicians and other leaders are fearful of the backlash of the people when they come to discover the lies and cover-up of many years about earth's vulnerability, that our government kept secret (under penalty of death) and still refuses to let the citizens know so they can organize and prepare (worldwide). Instead they have fabricated what is to blame in nature and diverted public attention. This tactic maintains protection for officials and their friends allowing time to construct their hiding places and escape the apocalypse.

B U T G O D ! CALL ON THE ONLY TRUE GOD NOW FOR HELP TO GET READY.

WE WILL PRAY FOR YOU, JUST CONTACT US

DO WHATEVER YOU HAVE TO DO TO PREPARE . . .

Location... location ... location ... RE-LOCATE, Change your place of living to a safer area. You should move away from large, congested negatively charged big cities like N.Y, Miami, Chicago, L.A., Denver and Atlanta, San Francisco. Explore and move to the mountainous areas of Arizona, Montana, Colorado and Tennessee.

By all means, relocate if you a living in a coastal region and move at least 150 miles inland and 700+ ft. high, as soon as possible. Neither coast of the USA will be safe past the summer of 2011. Leave any known quake areas like the San Andreas and New Madrid (Arkansas). Move away from Volcano country, even if they are sleeping because it's unsafe to assume they won't erupt and have their toxic smoke carried by the winds.

GATHER SUPPLIES, USING THE LISTS PROVIDED

Read these websites for specific help

<http://beprepared.com> Emergency Essentials Supplier, Info

<http://ready.adcouncil.org/beprepared>

<http://www.ready.gov>

Because earthquakes will happen to so many inland areas, the following information is provided.

Earthquake preparedness - DARE TO PREPARE Campaign

<http://www.earthquakecountry.info/roots>

(Earthquake Country Alliance/Southern California Earthquake Center)

www.espfocus.org (Emergency Survival Program)

www.oes.ca.gov (California Governor's Office of Emergency Services)

www.redcross.org (American Red Cross)

The website, <http://daretoprepare.org/> is especially helpful

Acknowledging that "Shift Happens," the main message of the Dare to Prepare campaign is that if you "[Secure Your Space](#)" AHEAD of time so you can protect yourself, your family, and your property. Secure your space by strapping [top-heavy furniture](#) and [appliances](#) to walls, adding latches to [kitchen cabinets](#), and securing [TVs and other heavy objects](#) that can topple and cause serious injuries. [Homes and other buildings](#) should be retrofitted if necessary. These and other actions will greatly reduce your risk of damage or injury, and limit your need for community resources after the next earthquake.

The readiness actions of "Secure Your Space" taken before the next earthquake are designed to reduce your risk of injury and financial loss. When an earthquake does occur, you should still [Drop, Cover, and Hold On](#) immediately to protect yourself from anything that is not secured. Face away from windows or mirrors to protect your face from flying glass.

You will be largely on your own following a catastrophic earthquake, so you need to survive the event as uninjured as possible. "Secure Your Space" to address the hazards described above that may injure people at work and home, and cause serious financial impacts to you and your family.

Drop, Cover, and Hold On! By Earthquakecountry.info

Read our [special report](#) about why firefighters, search and rescue experts, public health officials, emergency managers, and many others recommend that you "drop, cover, and hold on" to protect yourself during earthquake shaking... and why you [shouldn't believe](#) the "[triangle of life](#)" e-mail.

TROUBLED TIMES - THE TRANSFORMATION

<http://www.zetataalk.com/thub.htm>

What do the Troubled Times team recommend you gather, for an emergency pole shift survival pack?

- small shovel for digging a trench, preferably a military type shovel
- an ax to cut and split wood
- a wok for boiling and cooking food, and to act as a serving dish
- a meat cleaver, also can be used to create tinder slivers from wood when starting fires
- pliers, vise grips, and heavy-duty sheet metal shears for rescue and shelter building
- spools of wire, brass to avoid rusting, to making traps to snare small game, and fish hooks
- water distillation rig,
- book on edible wild plants
- first-aid kit
- matches or fire starting flint

These are not the items that many might throw in a backpack - candy bars, change of underwear, and flashlights, but the long term, rather than the very short term, are being considered. Those with only such a backpack cobbled together at the last minute will be assumed to be on foot, and walking a lot. It is advised that those on foot should pay particular attention to their feet, changing their socks frequently to keep the feet dry.

DRINKING WATER

Distilling drinking water not only gets rid of germs, due to the boiling process, but also heavy metals such as mercury and lead, and pollutants such as gasoline that may be in the ground or well water.

Water distillation can be a simple matter, as described in the Troubled Times booklet:

You can distill water with an ordinary household pot with two pot lids. Boil water in a pot covered with the first pot lid. When water condenses on this pot lid, it is distilled water. Replace this first pot lid with a second one, and flip the first one over, bottom up, so that all the condensed water collects in the lid, then pour this into a cup. Just keep repeating the steps until you have a full cup.

A second easy and portable distillation method is to have stacked pots, the upper pot holding cold water forcing condensation on its bottom while the bottom pot boils. In between, a pie pan with a drain hole and tube to catch the distillate. This method produces a gallon of distilled drinking water in 2 /12 hours, and in the end, you've got a pot of hot water for washing in the top pot.

TOILET PAPER

Hygiene, handy toilet paper, soap, toothbrush and paste, and disposable diapers, is something modern man has come to take for granted. What did the cave man use or what to today's hunting and gathering tribes use?

There are a number of options for toilet paper, including sand, ashes, leaves, or moss, and my favorite, sitting on a pine branch such that it swings backwards as you stand up. Moss also makes good diaper filler, if washing diapers is not convenient, and this applies to menstrual periods also.

A toothbrush can be fashioned from a furred end of a branch, and rinsing with salt and water can kill germs.

HAND TOOLS

Hand tools, not those items run by electricity, will be a necessity.

Many hand tools, such as a cross cut saw for only \$20 from Harbor Freight, can be purchased. Often yard sales will produce hand tools from the past, something grandpa used but now considered trash, replaced by modern drills and saws that WILL NOT WORK when the grid is down. Be sure to include plenty of nails, screws, and bolts. Jacks and pulley systems can move heavy objects, so don't forget plenty of rope and chain.

SHELTER

Assuming you did not have time to grab a tent, creating shelters while on foot is still possible. These can range from sleeping under a tarp, creating a tent from saplings and branches, or finding a rock overhang or cave.

Another good Indian trick for temporary shelter is to find a cluster of saplings and bend them over and tie them to each other without cutting them down. They are already anchored down and after being bent can be thatched, etc. to provide reasonable cover. When you leave just remove the rope you used to tie them up and everything is restored to its original natural state.

SEEDS - I highly advise everyone to get their hands on the book, "SEED to SEED"

By Suzanne Ashworth, and PRACTICE the art of seed gathering, starting NOW.

If you are a city dweller, and protest you have no opportunity, you're not noticing what you're trashing. Are you eating acorn squash, melons, and peppers, and trashing the seeds? Are you eating tomatoes, and eating the seeds?

Ripen that pepper in a window sill, alongside a bowl of moldering tomato seeds.

Scrape out and clean those squash and melon seeds.

Don't toss that bunch of Indian corn used as a decoration at Fall, but shuck and store the seed. You'll be gathering the seeds you'll need for your future garden, right NOW.

A note on bee keeping and need for pollinators.

Many many bugs pollinate plants. I've seen wasps and bumble bees and beetles and ants crawling all over flowers in my garden, and they were more numerous than the wild honey bees. Also, some staples like tomatoes and beans are self pollinating; requiring only a gentle wind to make it happen, and other plants like corn are wind pollinated. So don't panic if you don't have a bee hive nearby.

ELECTRICITY

12 V electricity is the way to go, as it can use your car batteries and headlights, and camping and boating lighting systems are 12 V systems. 12 V systems also require less juice, so any windmill or water wheel system established to generate electricity will go farther. In a pinch, one can use the rear wheel of a bike gen rig combined with an alternator, to recharge batteries. Crank-up devices, as a means of powering a radio or flashlight, are also available.

A Crank- Up Radio Helps Africa Tune In

New York Times, Feb 8, 1996

For about six weeks now, a small factory in [Milnerton, South Africa], just north of Cape

Town has been cranking out radios with cranks. Give the handle a few aerobic turns and the Freeplay radio holds forth for half an hour. ... It weighs six pounds, it's built like an overstuffed lunch box, and it has a tinny speaker. The wholesale price is only \$40 and it gets AM, FM and shortwave.

WINDMILLS and waterwheels taking advantage of natural wind and water flows will be a more permanent source of electricity. All these rigs require a lot of parts and expertise may require a battery system, so are not a casual undertaking.

Steam is also a time honored way to generate electricity and transportation, as in the old steam trains that puffed across the prairies, but steam carries the caution of potential severe burns from burst pipes. As a replacement for gasoline, wood gas or biomass fuels are used TODAY.

I quote from the Troubled Times pages, a report from Olli in Finland:

My cousin got a wood gas powered car as a gift a couple of months ago. It is a Volvo 245 station wagon with a 2.1 liter engine year model 1974, modified to use wood gas sometime in the early 90's.

I personally am quite impressed with the performance: top speed 100+ km/h. I expected much less. We have used pieces of birch wood as the fuel. It MUST be dry or it won't work. With the car we got quite good documentation of the wood gas system with drawings. Almost all non-military trucks and buses in Finland were operating with wood gas during the Second World War and even up to the early 50's. All gasoline available went to military use. I have heard that the Finnish army used a couple of wood gas powered trucks even in 1964. In a local magazine there was recently an Article on wood gas equipped cars. The story says that there are about 40 wood gas equipped vehicles in Finland today.

The diagrams that came with Olli's wood gas burning car are available on the Troubled Times.com web site, by the way, and are included with those \$4.10 CD's that include all of the Troubled Times pages. Print them off and have them handy!

End
